It's all about patient outcomes... /

The Ella Danis stent provides a fast, safe and effective treatment option for patients with refractory oesophageal variceal bleeds.

Designed to tamponade oesophageal varices whilst maintaining normal dietary intake and minimising the need for high-dependency observation, Danis can stabilise your patient allowing time to plan future treatment options and improve patient outcomes.

Product benefits:

- **Improved patient quality of life compared to balloon tamponade**
- **A 2010 study concluded, 'insertion of the SX-Ella Danis stent in patients with refractory variceal bleeding or complications of previous therapy is effective for the control of bleeding'¹**
- **Reduces potential resource-drain on high dependency units**
- **Can be placed without imaging guidance in emergency situations**
- **Significantly reduced complications and SAEs when compared to balloon tamponade in acute oesophageal varices²**

Additional information?

If you would like further assistance with using our Danis stent, or need advice on how to order, please call us on: **0114 268 8880**

Product features:

Large 25mm diameter stent body for enhanced tamponade effect

Unique variable stent weave reduces risk of migration

Medical grade alloy retrieval loops with gold marker at both ends for easy removal

Silicone covered nitinol stent

30mm flared stent ends with 2mm uncovered section

Balloon style delivery system enables accurate positioning at the GOJ

Distal release pull-back stent deployment

It's the Results²

Control of bleeding

- Danis
- Sengstaken-blakemore

Serious Adverse Events

- Danis
- Sengstaken-blakemore

Transfusion

- Danis patients
- Sengstaken-blakemore patients

Kit contents:

- 28F delivery system with pre-loaded stent
- Balloon valve
- 50ml syringe
- 0.035 guidewire

Ordering Information

Product	Product Code	Nominal Diameter (mm)	Nominal Length
Danis Stent	019-08S-25-135-B	25	135mm
ELLA Extractor System	015-01-28-1000	9.4	100cm

Additional information:

- Delivery system 28F / 20F, active length 60cm
- Ella extractor assists with safe, atraumatic removal of the Danis stent
